

Tax Assessment System

End-to-End Workflow

Evidence of a complete case lifecycle, captured from a live run.

Generated	2026-09-18T13:21:41.067Z
Run started	2026-09-18T13:20:49.009Z
Run ended	2026-09-18T13:21:37.014Z
Steps recorded	38

Environment under test

API	http://localhost:3000
Web	http://localhost:4200
Keycloak	http://localhost:8085
Postgres	localhost:5433
Workflow engine	http://localhost:8080 (Flowable)
Containers	podman

Contents

Step 1	The authority opens an assessment	Step 21	The determination is written into a notice
Step 2	Third-party evidence is gathered	Step 22	The notice still says what it said when issued
Step 3	The case is given to a named officer	Step 23	The notice is despatched, and the clock starts
Step 4	The work reaches the officer who must do it	Step 24	The taxpayer now has a window to object
Step 5	The assessor takes the case up	Step 25	The taxpayer disputes the assessment
Step 6	The assessor states what the return got wrong	Step 26	Whether to hear it is decided before what to decide
Step 7	The liability is computed, showing its working	Step 27	What the taxpayer must pay to be heard
Step 8	The assessment goes for a second pair of eyes	Step 28	The people who considered it say what they thought
Step 9	The assessor cannot accept their own work	Step 29	The objection is rejected, with reasons
Step 10	The reviewer is not satisfied	Step 30	The status decides the shape, not the officer
Step 11	The assessor picks the returned case back up	Step 31	The dispute leaves the authority
Step 12	The liability is computed again	Step 32	What the tribunal held is transcribed, not decided
Step 13	The reworked assessment goes back to the reviewer	Step 33	The file is closed and the final position frozen
Step 14	The reviewer accepts the reworked assessment	Step 34	Everything that happened, in order, unalterable
Step 15	The platform decides who must approve	Step 35	The same history, against the process it followed
Step 16	The action bar offers the assessor nothing	Step 36	A gap: the only state a case can be cancelled from lasts about a second
Step 17	The taxpayer sees their own affairs and nothing else	Step 37	The case is parked on the taxpayer
Step 18	The assessment is approved	Step 38	A gap: only the taxpayer may answer, and they cannot reach this screen
Step 19	An approved assessment is not yet a determination		
Step 20	A gap: nothing an officer can press finalises a case		

Coverage of the case state machine

The case lifecycle declares 44 transitions. A transition counts as covered when a step in this run drove exactly that move.

From	Action	To	Actors	Covered
(case creation)	INITIATE	INITIATED	TA_SUPERVISOR, SYSTEM, TA_ADMIN	Covered by step 1
INITIATED	RETRIEVE_DATA	DATA_READY	SYSTEM	Covered by step 2
INITIATED	CANCEL	CANCELLED	TA_SUPERVISOR	Not covered by this run
DATA_READY	ASSIGN	ASSIGNED	TA_SUPERVISOR	Covered by step 3
ASSIGNED	START	IN_PREPARATION	TA_ASSESSOR	Covered by step 5
IN_PREPARATION	REQUEST_INFO	AWAITING_TAXPAYER	TA_ASSESSOR	Covered by step 37
AWAITING_TAXPAYER	RESPOND	IN_PREPARATION	TA_TAXPAYER	Not covered by this run
AWAITING_TAXPAYER	TIMEOUT	IN_PREPARATION	SYSTEM	Not covered by this run
IN_PREPARATION	CALCULATE	CALCULATED	TA_ASSESSOR, SYSTEM	Covered by step 7, 12
CALCULATED	SUBMIT	UNDER_REVIEW	TA_ASSESSOR	Covered by step 8, 13
UNDER_REVIEW	RETURN	REVIEW_RETURNED	TA_REVIEWER	Covered by step 10
REVIEW_RETURNED	START	IN_PREPARATION	TA_ASSESSOR	Covered by step 11
UNDER_REVIEW	ACCEPT	REVIEWED	TA_REVIEWER	Covered by step 14
REVIEWED	ROUTE_APPROVAL	PENDING_APPROVAL	SYSTEM	Covered by step 15

From	Action	To	Actors	Covered
PENDING_APPROVAL	APPROVE	APPROVED	TA_APPROVER_L1, TA_APPROVER_L2, TA_APPROVER_L3	Covered by step 18
PENDING_APPROVAL	REJECT	REJECTED	TA_APPROVER_L1, TA_APPROVER_L2, TA_APPROVER_L3	Not covered by this run
REJECTED	START	IN_PREPARATION	TA_ASSESSOR	Not covered by this run
APPROVED	FINALISE	FINALISED	SYSTEM	Not covered by this run
FINALISED	GENERATE_NOTICE	NOTICE_GENERATED	SYSTEM	Covered by step 21
NOTICE_GENERATED	SERVED	NOTICE_SERVED	SYSTEM, TA_NOTICE_ISSUER	Covered by step 23
NOTICE_SERVED	START_RESPONSE_WINDOW	AWAITING_TAXPAYER_RESPONSE	SYSTEM	Covered by step 24
AWAITING_TAXPAYER_RESPONSE	PAYMENT_SETTLED	SETTLED	SYSTEM	Not covered by this run
AWAITING_TAXPAYER_RESPONSE	FILE OBJECTION	UNDER OBJECTION	TA_TAXPAYER, TA_OBJECTION_OFFICER, TA_SUPERVISOR	Covered by step 25
AWAITING_TAXPAYER_RESPONSE	WINDOW_LAPSED	CLOSED	SYSTEM	Not covered by this run
UNDER OBJECTION	DECIDE_ALLOWED	OBJECTION_ALLOWED	TA_OBJECTION_OFFICER	Not covered by this run
UNDER OBJECTION	DECIDE_PARTLY_ALLOWED	OBJECTION_PARTLY_ALLOWED	TA_OBJECTION_OFFICER	Not covered by this run
UNDER OBJECTION	DECIDE_REJECTED	OBJECTION_REJECTED	TA_OBJECTION_OFFICER	Covered by step 29
OBJECTION_ALLOWED	REASSESS	REASSESSMENT_INITIATED	SYSTEM	Not covered by this run

From	Action	To	Actors	Covered
OBJECTION_PARTLY_ALLOWED	REASSESS	REASSESSMENT_INITIATED	SYSTEM	Not covered by this run
OBJECTION_REJECTED	FILE_APPEAL	UNDER_APPEAL	TA_TAXPAYER, TA_APPEALS_OFFICER, TA_SUPERVISOR	Covered by step 31
OBJECTION_REJECTED	CLOSE	CLOSED	SYSTEM, TA_SUPERVISOR	Not covered by this run
UNDER_APPEAL	RECORD_UPHELD	APPEAL_UPHELD	TA_APPEALS_OFFICER	Not covered by this run
UNDER_APPEAL	RECORD_VARIED	APPEAL_VARIED	TA_APPEALS_OFFICER	Not covered by this run
UNDER_APPEAL	RECORD_SET_ASIDE	APPEAL_SET_ASIDE	TA_APPEALS_OFFICER	Covered by step 32
UNDER_APPEAL	RECORD_REMANDED	APPEAL_REMANDED	TA_APPEALS_OFFICER	Not covered by this run
APPEAL_VARIED	REASSESS	REASSESSMENT_INITIATED	SYSTEM	Not covered by this run
APPEAL_REMANDED	REASSESS	REASSESSMENT_INITIATED	SYSTEM	Not covered by this run
APPEAL_SET_ASIDE	CLOSE	CLOSED	SYSTEM, TA_SUPERVISOR	Covered by step 33
APPEAL_UPHELD	PAYMENT_SETTLED	SETTLED	SYSTEM	Not covered by this run
REASSESSMENT_INITIATED	START	IN_PREPARATION	TA_ASSESSOR	Not covered by this run
SETTLED	CLOSE	CLOSED	TA_SUPERVISOR, SYSTEM	Not covered by this run

From	Action	To	Actors	Covered
INITIATED	LIMITATION_EXPIRED	TIME_BARRED	SYSTEM	Not covered by this run
IN_PREPARATION	LIMITATION_EXPIRED	TIME_BARRED	SYSTEM	Not covered by this run
AWAITING_TAXPAYER_RESPONSE	WRITE_OFF	WRITTEN_OFF	TA_SUPERVISOR	Not covered by this run

Covered 20 of 44. Not covered 24. Coverage 45.5%.

Step 1. The authority opens an assessment

Actor: supervisor | **Kind:** transition | **Transition:** (none) --INITIATE--> INITIATED | **Status after:** Data ready | **Recorded at:** 2026-09-18T13:20:49.009Z

A supervisor opens a desk assessment against a company for one tax year, giving the reason it was selected. Nothing is assessed yet: opening a case is the authority putting on record that it intends to look at this period, which starts the limitation clock and makes every later act attributable.

What this proves. The register issues a case number of the form TA..., and the case exists.

Journey

Timeline

Evidence

Frozen once the case is submitted for review, so the reviewer decides on the facts the assessment was prepared from.

Retrieve evidence

Declared figures

Mapped from the filed return by the tax concept on each form field. A field with no concept is context for a caseworker, not an input to the assessment.

Nothing was declared. That is a non-filer assessment, not an error.

Sources and hashes

Each retrieval is hashed so the facts a decision rested on can be shown to be unchanged.

SOURCE	RETRIEVED	CONTENT HASH
FILING_STORE	2026-09-18 18:50	07da776b65260308Feb360e0...
TAXPAYER_ACCOUNT	2026-09-18 18:50	07f1bbf26567995929149412...

Step 2. Third-party evidence is gathered

Actor: system (process engine) | **Kind:** transition | **Transition:** INITIATED --RETRIEVE_DATA--> DATA_READY | **Status after:** Data ready | **Recorded at:** 2026-09-18T13:20:50.094Z

The platform asks every configured source for what it holds on this taxpayer: the filed return, bank interest, third-party sales data. The case becomes workable only once every mandatory source has answered, which is why nobody presses a button called "the data arrived". Here the process engine drove it, unprompted, seconds after the case opened.

What this proves. The status reads Data ready and the evidence tab lists the sources that answered.

Step 3. The case is given to a named officer

Actor: supervisor | **Kind:** transition | **Transition:** DATA_READY --ASSIGN--> ASSIGNED | **Status after:** Assigned | **Recorded at:** 2026-09-18T13:20:52.140Z

A supervisor hands the case to a particular assessor by name. The server refuses an assignment that names nobody, because a case recorded as assigned but sitting in no officer's queue is worse than one still waiting to be given out.

What this proves. The status reads Assigned and the header records who holds the case.

Step 4. The work reaches the officer who must do it

Actor: assessor | **Kind:** observation | **Transition:** none (no lifecycle move) | **Status after:** unchanged | **Recorded at:** 2026-09-18T13:20:54.003Z

The register each officer sees is scoped to the cases they hold. This is the whole point of assigning: a case that does not appear here is one its owner cannot find and therefore will not work.

What this proves. The case number TA202600000036 is listed in the assessor's own register.

Step 5. The assessor takes the case up

Actor: assessor | **Kind:** transition | **Transition:** ASSIGNED --START--> IN_PREPARATION | **Status after:** In preparation | **Recorded at:** 2026-09-18T13:20:55.405Z

Starting preparation is the assessor accepting the case as their own work. From here the figures may be changed, and every change is attributed to them. The separate step exists so that the time a case sat unopened is visible.

What this proves. The status reads In preparation.

Step 6. The assessor states what the return got wrong

Actor: assessor | **Kind:** observation | **Transition:** none (no lifecycle move) | **Status after:** In preparation | **Recorded at:** 2026-09-18T13:20:56.737Z

The assessor adds forty thousand to declared revenue, citing a mismatch with third-party data. An adjustment is a claim about the facts and must carry its type, its statutory reason and a narrative, because this is the paragraph the taxpayer will be answering if they object.

What this proves. The adjustment appears in the case with its amount, reason and narrative.

Step 7. The liability is computed, showing its working

Actor: assessor | **Kind:** transition | **Transition:** IN_PREPARATION --CALCULATE--> CALCULATED | **Status after:** Calculated | **Recorded at:** 2026-09-18T13:20:58.210Z

The server applies the rule set for this jurisdiction and year to the evidence and the adjustments. It returns not only the figure but the trace: every step, in order, with the amount before and after. A reviewer checks the trace by hand, which is why the right answer reached by the wrong route is treated as a defect here.

What this proves. The status reads Calculated and the trace lists more than three arithmetic steps.

What changed

Calculate

Computed on the server against the rule set in force for the period. The browser displays; it never calculates.

Version 1 · rule set GB-CIT-FY2024 v1 · 2026-09-18 18:50

Declared	0.00
Adjustments	40,000.00
Assessed base	40,000.00
Losses set off	0.00
Taxable base	40,000.00
Tax before credits	7,600.00
Credits	0.00
Penalty	0.00
Interest	0.00
Net payable	7,600.00 GBP

How this figure was reached

Every line is arithmetic you can check by hand. That is the test a trace has to pass.

#	STEP	WORKING	RESULT
1	BASE_DETERMINATION	0 + 40000 = 40000	40,000.00
2	LOSS_SET_OFF	No losses available or no loss rule in force	0.00
3	TAXABLE_BASE	(40000 - 0) rounded HALF_UP to 0 dp = 40000	40,000.00
4	RATE_APPLICATION GB-CIT-FY2024/RATE_BAND/1	40000 x 0.19 = 7600 (at or below the lower limit 50000)	7,600.00
5	RATE_APPLICATION	tax on 40000 = 7600	7,600.00
6	SURCHARGE	No surcharge in force	0.00
7	CREDITS	7600 - 0 = 7600	7,600.00
8	PENALTY	No penalty applies	0.00
9	INTEREST	Paid on time	0.00
10	NET_POSITION	(7600 + 0 + 0) - 0 = 7600 (payable)	7,600.00

Step 8. The assessment goes for a second pair of eyes

Actor: assessor | **Kind:** transition | **Transition:** CALCULATED --SUBMIT--> UNDER_REVIEW | **Status after:** Under review | **Recorded at:** 2026-09-18T13:20:59.238Z

No assessment leaves the authority on one officer signature. Submitting hands the work to a reviewer and closes the assessor out of it, which is the moment the separation of duties starts to bite.

What this proves. The status reads Under review.

Step 9. The assessor cannot accept their own work

Actor: assessor | **Kind:** refusal | **Transition:** none (no lifecycle move) | **Status after:** Under review | **Recorded at:** 2026-09-18T13:21:00.263Z

The assessor presses Accept on the case they just wrote. The server refuses and names the role that may act. Segregation of duties is not a feature anybody can see working; it is only visible when somebody tries the shortcut and is stopped.

What this proves. A red alert quotes the server: the action requires a reviewer, and the status has not moved.

Step 10. The reviewer is not satisfied

Actor: reviewer | **Kind:** transition | **Transition:** UNDER_REVIEW --RETURN--> REVIEW_RETURNED | **Status after:** Review returned | **Recorded at:** 2026-09-18T13:21:01.360Z

A review that can only say yes is not a review. The reviewer returns the case to the assessor, and the return is recorded as its own event rather than as a silent reversal, so that a case reworked three times reads differently from one accepted first time.

What this proves. The status reads Review returned and the case is back with the assessor.

Step 11. The assessor picks the returned case back up

Actor: assessor | **Kind:** transition | **Transition:** REVIEW_RETURNED --START--> IN_PREPARATION | **Status after:** In preparation | **Recorded at:** 2026-09-18T13:21:02.417Z

A returned case goes back to preparation rather than to a special rework state, because the work is the same work. The history keeps the loop visible, so the second submission is plainly a second submission.

What this proves. The status reads In preparation again, with the earlier adjustment still there.

Step 12. The liability is computed again

Actor: assessor | **Kind:** transition | **Transition:** IN_PREPARATION --CALCULATE--> CALCULATED | **Status after:** Calculated | **Recorded at:** 2026-09-18T13:21:02.881Z

Recalculating supersedes the previous result rather than editing it. The earlier figures stay in the record with their own trace, because a case that was once assessed at a different number is a fact an appeal may turn on.

■ **What this proves.** The status reads Calculated and a current result carries a fresh trace.

Version 2 · rule set `GB-CIT-FY2024` v1 · 2026-09-18 18:51

Declared	0.00
Adjustments	40,000.00
Assessed base	40,000.00
Losses set off	0.00
Taxable base	40,000.00
Tax before credits	7,600.00
Credits	0.00
Penalty	0.00
Interest	0.00
Net payable	7,600.00 GBP

How this figure was reached

Every line is arithmetic you can check by hand. That is the test a trace has to pass.

#	STEP	WORKING	RESULT
1	BASE_DETERMINATION	$0 + 40000 = 40000$	40,000.00
2	LOSS_SET_OFF	No losses available or no loss rule in force	0.00
3	TAXABLE_BASE	$(40000 - 0)$ rounded HALF_UP to 0 dp = 40000	40,000.00
4	RATE_APPLICATION <code>GB-CIT-FY2024/RATE_BAND/1</code>	$40000 \times 0.19 = 7600$ (at or below the lower limit 50000)	7,600.00
5	RATE_APPLICATION	tax on 40000 = 7600	7,600.00
6	SURCHARGE	No surcharge in force	0.00
7	CREDITS	$7600 - 0 = 7600$	7,600.00
8	PENALTY	No penalty applies	0.00
9	INTEREST	Paid on time	0.00
10	NET_POSITION	$(7600 + 0 + 0) - 0 = 7600$ (payable)	7,600.00

Versions

Every recalculation is kept. "The officer asked for a recalculation at this time" is itself a fact worth recording.

VERSION	RULE SET	CALCULATED	NET PAYABLE
2	<code>GB-CIT-FY2024</code>	2026-09-18 18:51	7,600.00
1	<code>GB-CIT-FY2024</code>	2026-09-18 18:50	7,600.00

Step 13. The reworked assessment goes back to the reviewer

Actor: assessor | **Kind:** transition | **Transition:** CALCULATED --SUBMIT--> UNDER_REVIEW | **Status after:** Under review | **Recorded at:** 2026-09-18T13:21:03.137Z

The same transition as the first submission, driven a second time. The loop back through review is the ordinary shape of this work rather than an exception, and the state machine models it as one.

■ **What this proves.** The status reads Under review for the second time in this history.

Frozen once the case is submitted for review, so the reviewer decides on the facts the assessment was prepared from.

Retrieve evidence

Declared figures

Mapped from the filed return by the tax concept on each form field. A field with no concept is context for a caseworker, not an input to the assessment.

Nothing was declared. That is a non-filer assessment, not an error.

Sources and hashes

Each retrieval is hashed so the facts a decision rested on can be shown to be unchanged.

SOURCE	RETRIEVED	CONTENT HASH
FILING_STORE	2026-09-18 18:50	07da776b65260908feb360e0...
TAXPAYER_ACCOUNT	2026-09-18 18:50	07f1bbf26567995929149412...

Step 15. The platform decides who must approve

Actor: reviewer | **Kind:** transition | **Transition:** REVIEWED --ROUTE_APPROVAL--> PENDING_APPROVAL | **Status after:** Pending approval | **Recorded at:** 2026-09-18T13:21:05.439Z

Nobody chooses their own approver. The reviewer asks for routing and the platform matches the assessed amount against the configured delegation bands, then states in a sentence how it decided. That sentence is the answer to "why has this landed on me".

What this proves. The status reads Pending approval and the screen names the band the amount fell into.

Step 16. The action bar offers the assessor nothing

Actor: assessor | **Kind:** refusal | **Transition:** none (no lifecycle move) | **Status after:** Pending approval | **Recorded at:** 2026-09-18T13:21:07.022Z

The assessor opens the case waiting for approval and finds no Approve button. The server would refuse the action in any event; hiding it is a courtesy so that an officer is not invited to press something that will be denied.

What this proves. No control labelled Approve exists anywhere on the assessor’s view of the case.

Step 17. The taxpayer sees their own affairs and nothing else

Actor: acme-finance | **Kind:** refusal | **Transition:** none (no lifecycle move) | **Status after:** unchanged | **Recorded at:** 2026-09-18T13:21:08.696Z

A taxpayer signs in and gets the portal. Asked directly for the officer register and for this case, the server answers 403 to both, so the separation holds even for somebody who types the address by hand rather than following a menu. The screenshot shows what they do get: their own position, in plain words.

What this proves. GET /cases and GET /cases/{id} both return 403 for the taxpayer, while the portal loads.

Step 18. The assessment is approved

Actor: approver | **Kind:** transition | **Transition:** PENDING_APPROVAL --APPROVE--> APPROVED | **Status after:** Approved | **Recorded at:** 2026-09-18T13:21:09.584Z

An approver holding the delegation the amount requires signs the assessment off. This is the authority deciding, as an institution, that the figure is right. What follows is about giving it legal effect rather than about arriving at it.

What this proves. The status reads Approved and the action bar is empty.

Step 19. An approved assessment is not yet a determination

Actor: notice-issuer | **Kind:** refusal | **Transition:** none (no lifecycle move) | **Status after:** Approved | **Recorded at:** 2026-09-18T13:21:10.641Z

The notice issuer tries to issue the assessment notice on the approved case and is refused. A notice gives legal effect to a determination, so it may only be issued from a finalised one. Finalisation is the point of no return: it consumes the losses the calculation relied on and stops the figures being recomputed.

What this proves. A red alert quotes the server: the notice may only be issued once the assessment is finalised.

Case TA202600000036 is APPROVED. A notice gives legal effect to a determination, so it may only be issued once the assessment is finalised.

Notices

A notice gives legal effect to the determination, so it may only be issued from a finalised assessment. Re-issuing creates a new version; the taxpayer may hold the old one.

Assessment

Issue notice

No notices issued. Nothing has been served on the taxpayer yet.

Step 20. A gap: nothing an officer can press finalises a case

Actor: approver | **Kind:** observation | **Transition:** none (no lifecycle move) | **Status after:** Finalised | **Recorded at:** 2026-09-18T13:21:11.773Z

APPROVED to FINALISED is the only move in this journey that no officer can make. The API grants POST /cases/{id}/finalise to approvers and supervisors, the web application calls it from nowhere, and the process definition has no step for it either, so an approved case stops dead. This run called that endpoint directly to reach the stages after it; the transition is deliberately left unrecorded, because no screen drove it and the coverage matrix should say so.

What this proves. The case was APPROVED before the call and reads Finalised after it, with no control on any screen that performs it.

TAXPAYER_ACCOUNT	2026-09-18 18:50	07f1bbf26567995929149412...

Step 21. The determination is written into a notice

Actor: notice-issuer | **Kind:** transition | **Transition:** FINALISED --GENERATE_NOTICE--> NOTICE_GENERATED | **Status after:** Notice generated | **Recorded at:** 2026-09-18T13:21:13.705Z

The notice issuer renders the assessment notice from the configured template and the finalised figures. The document is hashed as it is written, and re-issuing produces a new version rather than editing the old one, because the taxpayer may be holding the old one. The case moves on as a consequence of the notice existing, which is why the transition belongs to SYSTEM rather than to the officer.

What this proves. The status reads Notice generated and a numbered, versioned notice is listed.

Step 22. The notice still says what it said when issued

Actor: notice-issuer | **Kind:** observation | **Transition:** none (no lifecycle move) | **Status after:** Notice generated | **Recorded at:** 2026-09-18T13:21:14.709Z

Verification recomputes the hash from the stored text and compares it with the one recorded at issue. It is a button rather than a badge because the question is asked at a particular moment, usually in a dispute, and an automatic green tick on every page load is a check nobody reads.

What this proves. The screen reports Unaltered and prints the stored and recomputed hashes.

Not yet served. Until it is, no objection window is running.

Channel

Email

Addressee

Proof reference

Tracking number

Serve

Step 23. The notice is despatched, and the clock starts

Actor: notice-issuer | **Kind:** transition | **Transition:** NOTICE_GENERATED --SERVED--> NOTICE_SERVED | **Status after:** Awaiting taxpayer response | **Recorded at:** 2026-09-18T13:21:15.990Z

The officer records a despatch: the channel, who it went to, and the proof reference they can produce later. Each attempt is its own row with its own outcome, because service by post that comes back and service by email that does not are different facts. The deemed service date, not the despatch date, is what the objection window runs from. The status badge skips straight past Notice served because the same act opens the response window, which the next step shows.

What this proves. A service attempt is listed with its channel, addressee and deemed service date, and the case is served.

Step 24. The taxpayer now has a window to object

Actor: system | **Kind:** transition | **Transition:** NOTICE_SERVED --START_RESPONSE_WINDOW--> AWAITING_TAXPAYER_RESPONSE | **Status after:** Awaiting taxpayer response | **Recorded at:** 2026-09-18T13:21:16.894Z

The same act that recorded service opened the response window, and materialised the objection deadline from the deemed service date under the jurisdiction's calendar rules. No officer presses a button called this, and none should: the window is a consequence of service in law, not a decision anybody takes.

What this proves. The status reads Awaiting taxpayer response and a dated objection deadline is listed with how it was derived.

Timeline

Statutory deadlines

Dates the taxpayer is bound by. Each runs from a recorded anchor event, on the jurisdiction's own working calendar.

DEADLINE	ANCHORED ON	DUE	STATE
OBJECTION	NOTICE_SERVED 2026-09-18	2026-10-19	Open

Service clocks

Internal targets. A missed service standard is never a time bar, which is why these are recorded apart from the deadlines above.

STANDARD	STAGE	STARTED	TARGET	STATE	REMAINING
PREPARATION	IN_PREPARATION	2026-09-18	2026-10-16	Met	—
REVIEW	UNDER_REVIEW	2026-09-18	2026-09-25	Met	—
PREPARATION	IN_PREPARATION	2026-09-18	2026-10-16	Met	—
APPROVAL	PENDING_APPROVAL	2026-09-18	2026-09-25	Met	—

Step 25. The taxpayer disputes the assessment

Actor: objection-officer | **Kind:** transition | **Transition:** AWAITING_TAXPAYER_RESPONSE --FILE_OBJECTION--> UNDER_OBJECTION | **Status after:** Under objection | **Recorded at:** 2026-09-18T13:21:18.304Z

An objection arrives by post and an officer records it on the taxpayer's behalf, which is how most of them arrive. It must state at least one ground and may name the amount in dispute. The platform accepts it even out of time and computes the lateness separately, because refusing at the door would deny a discretion the law gives to a person.

What this proves. The status reads Under objection and the objection is listed with its number and whether it was in time.

Step 26. Whether to hear it is decided before what to decide

Actor: objection-officer | **Kind:** observation | **Transition:** none (no lifecycle move) | **Status after:** Under objection | **Recorded at:** 2026-09-18T13:21:19.627Z

Admissibility is ruled on first and separately from the merits, and the ruling must give a reason. Refusing to hear somebody is the decision most likely to be challenged, so the platform will not let it be made silently. The case status does not move: the objection is admitted, the dispute is still open.

What this proves. The objection reads as admitted and the merits panel, with its opinion and decision controls, appears.

Step 27. What the taxpayer must pay to be heard

Actor: objection-officer | **Kind:** observation | **Transition:** none (no lifecycle move) | **Status after:** Under objection | **Recorded at:** 2026-09-18T13:21:21.065Z

Some jurisdictions require part of the disputed tax to be deposited before an objection is heard. The panel states the position and the arithmetic behind it, including any floor or cap, and any payment received is recorded against it. An unpaid deposit does not make the objection inadmissible; that stays a decision for a person.

What this proves. The deposit panel states either the amount required with its derivation, or that none is required here.

Step 28. The people who considered it say what they thought

Actor: objection-officer | **Kind:** observation | **Transition:** none (no lifecycle move) | **Status after:** Under objection | **Recorded at:** 2026-09-18T13:21:22.609Z

Opinions are recorded against named people and kept whatever the decision turns out to be. The decision is the deciding officer's and is not a tally of the votes, but a decision that goes against the opinions is logged as such, because that is precisely the one somebody will later be asked to justify.

■ **What this proves.** The objection lists the opinion against the officer who gave it.

Step 29. The objection is rejected, with reasons

Actor: objection-officer | **Kind:** transition | **Transition:** UNDER_OBJECTION --DECIDE_REJECTED-->
OBJECTION_REJECTED | **Status after:** Objection rejected | **Recorded at:** 2026-09-18T13:21:24.117Z

The officer rejects the objection and must say why. The server refuses a decision with no reasons: a decision the taxpayer cannot understand is a decision they cannot appeal against intelligibly, and in most jurisdictions that is itself a ground of appeal. Rejection opens the appeal window and leaves the assessment standing.

■ **What this proves.** The status reads Objection rejected and the decision is shown with the reasons given for it.

Step 30. The status decides the shape, not the officer

Actor: supervisor | **Kind:** refusal | **Transition:** none (no lifecycle move) | **Status after:** Objection rejected | **Recorded at:** 2026-09-18T13:21:25.186Z

There is one reassessment button and no dropdown asking which kind. A rejected objection leaves the assessment intact, so there is nothing to reassess and the server says so. Offering the choice would invite an officer to pick the shape that is not legally available.

What this proves. A red alert explains that a reassessment follows a dispute outcome or a closed case.

Closure

Journey

Timeline

Case TA202600000036 is OBJECTION_REJECTED. A reassessment follows either a dispute outcome or a closed case; this case is still in progress.

Reassess

A dispute outcome reassesses this case in place. A closed case is succeeded by a new one. The status decides which; you do not choose.

Grounds

Reopening the period on the strength of the rejected objection.

Limitation override reason

Only where the reassessment reaches past the limitation date. Lawful on narrow grounds such as fraud, and attributed to you.

Open reassessment

Every assessment of this period

Predecessors and successors, however many times the period was assessed.

This is the only assessment of the period.

Closure

Closing freezes the final position into the record. The balance is snapshotted rather than recomputed later, because the file must say what it said at the time.

Reason code

SETTLED_IN_FULL

Retention class

Statutory

Must be configured for the jurisdiction; the API lists the valid ones if not.

Narrative

Close case

Step 31. The dispute leaves the authority

Actor: appeals-officer | **Kind:** transition | **Transition:** OBJECTION_REJECTED --FILE_APPEAL--> UNDER_APPEAL | **Status after:** Under appeal | **Recorded at:** 2026-09-18T13:21:26.558Z

Having been rejected inside the authority, the taxpayer appeals to a tribunal. The forum must be one the jurisdiction recognises, and the forum's own reference is captured, because that number is the only thing tying the two files together when the tribunal writes back.

■ **What this proves.** The status reads Under appeal and the appeal is listed with its forum and reference.

Page 45 of 56

Step 32. What the tribunal held is transcribed, not decided

Actor: appeals-officer | **Kind:** transition | **Transition:** UNDER_APPEAL --RECORD_SET_ASIDE--> APPEAL_SET_ASIDE | **Status after:** Appeal set aside | **Recorded at:** 2026-09-18T13:21:28.052Z

There is no approve button anywhere on this panel. An appeal is decided by a forum outside the authority, so the officer is transcribing a judgment and must record the forum's reasons with it. Setting an assessment aside removes it, which is why the case can now only be closed rather than reassessed.

What this proves. The status reads Appeal set aside and the outcome is listed against the appeal with its reasons.

Only where the reassessment reaches past the limitation date. Lawful on narrow grounds such as fraud, and attributed to you.

Open reassessment

Every assessment of this period

Predecessors and successors, however many times the period was assessed.

This is the only assessment of the period.

Closure

Closed DISPUTE_EXHAUSTED on 2026-09-18.

ASSESSED	PAID	BALANCE	RETENTION
7,600.00	0.00	7,600.00 GBP	STATUTORY until 2033-09-18

Assessment set aside on appeal. No further route open to either party.

Legal hold

A hold outranks the retention date: a file under litigation survives its own destruction schedule. Both placing and lifting one require a reason.

Reason

Place hold

Lift hold

Page 48 of 56

Step 34. Everything that happened, in order, unalterable

Actor: supervisor | **Kind:** observation | **Transition:** none (no lifecycle move) | **Status after:** Closed | **Recorded at:** 2026-09-18T13:21:30.605Z

Every act in this document is an event in the ledger: who did it, when, and what the case looked like afterwards. The tables behind it are append-only, enforced by a database trigger rather than by a permission, so no update or delete can reach them from any code path. This is the record an audit reads.

■ **What this proves.** The timeline lists at least twelve events, covering opening through closure.

Step 35. The same history, against the process it followed

Actor: supervisor | **Kind:** observation | **Transition:** none (no lifecycle move) | **Status after:** Closed | **Recorded at:** 2026-09-18T13:21:31.833Z

The journey tab draws the deployed process definition and marks what has finished and what is waiting. A case with no process instance is a normal answer rather than an error: orchestration never fails a case, and one opened while the engine was unreachable is worked perfectly well by hand.

What this proves. The journey tab states either the instance and its position, or that no process is coordinating the case.

Step 36. A gap: the only state a case can be cancelled from lasts about a second

Actor: supervisor | **Kind:** refusal | **Transition:** none (no lifecycle move) | **Status after:** Data ready | **Recorded at:** 2026-09-18T13:21:33.816Z

A supervisor opens case TA202600000037 on a throwaway year and tries to cancel it straight away. The button is there and the server refuses it: the transition table allows CANCEL from INITIATED only, and the process engine had already moved the case to DATA_READY by the time the screen finished loading. The action bar and the state machine disagree, and the officer gets the error rather than the courtesy.

What this proves. The server answers "No transition defined from DATA_READY on action CANCEL", and the case is still Data ready.

Journey

Timeline

Evidence

Frozen once the case is submitted for review, so the reviewer decides on the facts the assessment was prepared from.

Retrieve evidence

Declared figures

Mapped from the filed return by the tax concept on each form field. A field with no concept is context for a caseworker, not an input to the assessment.

Nothing was declared. That is a non-filer assessment, not an error.

Sources and hashes

Each retrieval is hashed so the facts a decision rested on can be shown to be unchanged.

SOURCE	RETRIEVED	CONTENT HASH
FILING_STORE	2026-09-18 18:51	07da776b65260908feb360e0...
TAXPAYER_ACCOUNT	2026-09-18 18:51	07f1bbf26567995929149412...

Step 37. The case is parked on the taxpayer

Actor: assessor | **Kind:** transition | **Transition:** IN_PREPARATION --REQUEST_INFO--> AWAITING_TAXPAYER | **Status after:** Awaiting taxpayer | **Recorded at:** 2026-09-18T13:21:36.816Z

Case TA202600000038 needs something only the taxpayer holds, so the assessor asks for it and the case stops. The separate state matters for measurement: time spent waiting on a taxpayer is not time the authority took, and a service standard that counted it would be measuring the wrong thing.

What this proves. The status reads Awaiting taxpayer.

TAXPAYER_ACCOUNT	2026-09-18 18:51	07f1bbf26567995929149412...

Step 38. A gap: only the taxpayer may answer, and they cannot reach this screen

Actor: assessor | **Kind:** refusal | **Transition:** none (no lifecycle move) | **Status after:** Awaiting taxpayer | **Recorded at:** 2026-09-18T13:21:37.014Z

The assessor presses Record a response and the server refuses: RESPOND belongs to the taxpayer alone. But the taxpayer is refused the officer route with a 403, as this run showed earlier, so there is no screen anywhere from which this transition can be driven. The case can only leave this state on the system timeout. The button is offered to an officer who can never use it.

What this proves. A red alert names TA_TAXPAYER as the only permitted actor, and the status has not moved.
